

The 01MM-SLO2 is a high-performance omnidirectional amplified antenna, ideal for caravans, boats, and apartment installations. Its centrally mounted output connector is neatly concealed and protected within the mount, providing a clean and durable setup. Engineered for versatility, the SLO2 covers TV channels 6-12 and 28-51, ensuring reception across all broadcast areas. It also features a built-in 694 MHz low-pass filter, which effectively reduces interference from 4G/5G (LTE) signals, providing a clearer viewing experience. Designed to withstand the elements, the antenna is fully enclosed in a sealed plastic Radome and supplied with a 316 stainless steel bracket for exceptional corrosion resistance—making it a reliable choice in both marine and residential environments.

Features and Benefits

- » Engineered for use in marine environments, boats and coastal properties, plus caravans and motorhomes.
- » Suitable for use in discrete installations for apartment blocks and designer homes
- » Omnidirectional with flexible mounting options supplied for horizontal and vertical transmissions.
- » Fully encased with silicone-sealed plastic outer with a 316 stainless steel bracket to protect against corrosion.
- » Amplified antenna with 20dB of gain with built-in 694MHz low pass filter > 40dB attenuation at 750MHz to help eliminate 4G/5G (LTE) interference
- » Flexible powering with 5-24V DC compatibility (14V DC plug pack and DC CLA adaptor supplied)
