

# Digital TV Antenna 16 Element Log Periodic VHF/UHF (6-12)(28-51) with 4G/5G Filter 01MM-XL16

The XL16 is a heavy-duty VHF/UHF 16-element log-periodic antenna that delivers reliable digital TV reception across channels 6-12 and 28-51. A built-in 4G/5G LTE filter reduces unwanted cellular interference for cleaner signals. Featuring black powder-coated booms and mounting hardware, the XL16 blends seamlessly into modern homes and buildings. Supplied in a five-pack, it comes ready to install with easy snap-out elements, plus a professional front-mounted PCB and rear 'F' type connector for fast, secure connections

## Features and Benefits

- » Heavy-duty construction with black powder-coated booms and mounting assembly, delivering high performance with an aesthetically pleasing modern design.
- » Wideband log periodic style with built in 4G/5G LTE filter, receives channels 6-12 and 28-51 while filtering out any unwanted out-of-band signals
- » UHF elements from a 5mm aluminium rod with VHF elements in a 10mm aluminium tube with an efficient snap lock design
- » 'F' connector located at the rear of the antenna for ease of connection
- » Boom contact plates at the rear creates stub for improved VSWR
- » Supplied in individual compact cartons inside a convenient 5-pack outer
