

Digital TV Antenna VHF (6-12) 18 Elements O3MM-DR3018

For the Best

The O3MM-DR3018 is an 18-element VHF Yagi-style antenna receiving channels 6-12 with a maximum gain of 14dB. The antenna features a 4G/5G LTE filter built in to help eliminate interference and deliver the best possible pictures for viewing. With the elements constructed from heavy-duty 12.7mm extruded aluminium tube, the DR3018 is well designed to handle the harsh Australian environment. The DR3018 is the ultimate long-range Yagi for maximum band three signal reception in fringe areas.
