

100m High Performance 14AWG 2 Core Speaker Cable

04MM-SPK14-100

The 04MM-SPK14-100 is a high-quality 14AWG figure-8 speaker cable constructed from durable CCA (Copper Clad Aluminium), delivering a lightweight, flexible, and cost-effective solution for audio installations. A red stripe tracer runs along one side of the cable, ensuring quick identification and preventing accidental cross-polarity during connection. Designed for versatility, the SPK14 is ideal for wiring surround sound systems, including floor, wall, and ceiling speakers. Supplied on a 100m reel, it is perfectly suited for whole-home or building pre-wiring, making it a reliable choice for multi-room audio and entertainment systems.

Features and Benefits

- » High-Performance Design - 14AWG figure-8 speaker cable made from CCA (Copper Clad Aluminium) for reliable signal transfer and flexibility.
- » Easy Polarity Identification - Clear PVC insulation with a red stripe tracer for quick and accurate connections.
- » Optimised for Audio Systems - Suitable for high-powered surround sound, wall, ceiling, and multi-room speaker installations.
- » Convenient Supply Format - Supplied on a 100m plastic reel with printed meter markings for easy measuring and installation.
- » Precise Cable Dimensions - 7.4mm x 3.7mm (2 x 40 x 0.25mm ± 0.005mm), including insulation, ensuring consistent performance and durability.

Construction		
Conductor	Cores	2C
	Material	CCA (Copper Clad Aluminium)
	OD	16AWG (40/0.25mm + 0.005mm)
Sheath	Material	PVC (ROHS)
	Colour	Transparent (one core with red strip)
	OD	7.2mm * 3.7mm
	Thickness	1.1mm ± 0.05mm
Basic Characteristics		
Impedance	13.2Ω/KM	
Voltage	80V
