

Diplexer FTA/Satellite (Suitable for Clipsal®  
Double Gang Plate) (5 Pack)  
05MM-DOP2C

*For the Best*

The 05MM-DOP2C is a wall plate diplexer for use in SMATV systems. DOP2C separates satellite and CATV (FTA) RF signals at the wall plate from a single cable input so a TV and STB can be independently connected. This model is suitable for use with Clipsal 2000 dual gang switch plates. The DOP2C is Foxtel approved and supports an input frequency range of 5-2400MHz with an isolated output frequency range of FTA 5-862MHz and SAT 950-2400MHz.

**Features and Benefits**

- » Foxtel approved (F10234)
- » Includes 2x outlet plate inserts
