

2 Way Outlet Plate with Cable Management including 2 Blank Inserts **05MM-WP62**

The 05MM-WP62 is a cable management wall plate with 2 x mech insert points allowing you to run your AV cables directly between the source and display while also having terminated connections like TV or Data points fitted off neatly. This unit can help you run cables through a wall easily, with a large opening that can accommodate several cables at once while still keeping things neat and organised. It is perfect for use with our RP01/2/3 series recessed wall points to connect wall-mounted TVs with your entertainment system.

Features and Benefits

- » Push through cable management solution for computer networks, home theatre systems
- » Cabling remains neat, tidy and secure via the cable management push through system
- » Easy to run cables through the wall
- » 2 way outlet also includes 2 blank inserts
