Outlet Plate with Reverse Bull Nose (Black)
05MM-WP65B

The 05MM-WP65 is a sizeable reverse bullnose outlet plate, and the reversed bullnose allows the cables to be gently guided in the direction of travel to prevent cable strain in tight cavities. This unit features a brush style cover to the wall plate opening, allowing you to run AV, Data and TV cables through a wall directly between the source and display. The WP65 features a large opening that can accommodate several cables simultaneously while still keeping things neat and organised. It is ideal for computer networks as well as home theatre setups.

Features and Benefits

- This reverse bull nose cable management wall plate keeps cables tidy and secure
- Suitable for computer networks, home theatre systems, or any application which involves in-wall cabling
- Has a large opening that accommodates a large run of cables at once and allows 3 pin power cords to easily pass through
- Allows cables to enter the wall cavity space without the need for inter-connect fittings
- Ideal for pre-made leads directly out of the wall cavity
- Brush cover to keep dust away
