Outlet Plate with Brush Cover (20 Pack)
05MM-WP69

The 05MM-WP69 is a discrete cable management outlet plate. This unit features a brush style cover to the wall plate opening, allowing you to run AV, Data and TV cables directly between the source and display. This unit can help you run cables through a wall with ease, with a discrete slimline opening that can accommodate several cables at once while still keeping things neat and organised. It is perfect for use with our RP01/2/3 series recessed wall points to connect wall-mounted TVs with your entertainment system.

Features and Benefits

- This narrow opening cable management wall plate keeps cables tidy and secure
- Suitable for computer networks, home theatre systems, or any application which involves in-wall cabling
- Has a narrow opening that accommodates additional direct connection of pre-terminated cables
- Allows cables to enter the wall cavity space without the need for inter-connect fittings
- Ideal for pre-made leads directly out of the wall cavity
- Brush keeps dust away
