

3 Way Splitter 'F' Type 5-2400MHz Power
Pass All Ports (Blister Pack)
07MM-ES03-BP

The ES-BP series splitters are designed as a cost-effective option for domestic, MATV, and SMATV installations. The splitters are 'F' type all-port DC power pass and are rated 5-2400MHz, allowing for use in both terrestrial and satellite frequency ranges. The series comes in 2, 3, 4, 6, and 8 way options and is individually packaged in hang-sell blister packs, perfect for display stands and showcasing the product.

Features and Benefits

- » Suitable for both satellite and FTA distribution
- » 'F' type all port power pass (DC), connect power for masthead amplifiers to any port
- » 5-2400MHz operating frequency range
- » Fully shielded design for maximum signal integrity
- » Individually packaged with clear blister covers for display
- » Cost-effective design and construction

| Frequency range | 5-40MHz | 40-1000MHz | 1000-1750MHz | 1750-2400MHz |
|------------------|---------|------------|--------------|--------------|
| Insertion loss | ≤8.0dB | ≤8.5dB | ≤9.5dB | ≤11dB |
| Mutual Isolation | ≥18dB | ≥20dB | ≥20dB | ≥20dB |
| Return loss | ≥10dB | ≥10dB | ≥10dB | ≥10dB |
