

'F' Connector Removal and Insertion Tool

08MM-CR2206

The 08MM-CR2206 is an extended 'F' type connector removal and insertion tool. The CR2206 is the perfect accessory to use when cables are all bunched tightly together or are in difficult positions to reach by hand, multiswitch, tap and splitter 'F' ports are typical for this. In addition, the CR2206 features an 8mm side slot that allows you to insert the tool over existing RG6 and RG59 cables to seat the tool head over the 'F' connector to tighten or loosen. The tool also features an 'F' female thread on the handle to allow for assistance with pushing 'F' connectors onto cables when terminating.

Features and Benefits

- » Extended 156mm length to help reach difficult to access 'F' connectors
- » Integrated 'F' female connector on the tool handle to assist with fitting 'F' connectors to coaxial cables
- » Built-in 8mm side slot allowing you to insert the tool over existing RG6 and RG59 cables to seat the tool head over the 'F' connector
- » High-quality nickel-plated finish
- » Non-slip PVC handle
- » The ideal tool for speed and ease when working with 'F' type connectors
