

RG59/6/11 Compression Tool Kit for 'F' Type Connectors 08MM-MINICOMPKIT

For the Best

The 08MM-MINICOMPKIT is a compression tool kit for 'F' type connectors for RG59, RG6 and RG11 cables. The kit comes with a 08MM-CT01S compression tool with an extended plunger (17mm) for use with compact connectors QM06S and Foxtel approved APFCF-RG6, a 08MM-ST10 cable stripping tool for RG59, RG6 and RG11, plus a starter pack of 20x 08MM-QM06S quick-connect compression connectors. The CT01S plunger depth is adjustable to different depths, so it can be adapted to fit many different sleeve style 'F' type compression connectors making it the perfect tool in your kit.

Features and Benefits

- » The CT01S compression tool features an extended 17mm plunger for compact compression connectors (08MM-QM06S)
- » Cost-effective professional tools suitable for RG59, RG6 and RG11 cable preparation and 'F' compression connectors
- » ST10 stripping tool features an easy spring trigger to lock the coaxial cable into place for stripping, plus an integrated spanner for tightening and loosening 'F' type connections
- » ST10 has an adjustable blade to switch from RG59/RG9 to RG11 coaxial cable stripping
- » QM06S is a quick connect 0.3-3000MHz rated connector. No need to pull back the braid or remove the foil sheath from the cable like traditional connectors. Strip cable, place on the connector and compress
- » The ideal tool kit for speed and ease when working with 'F' type compression connectors

Kit Contains
