For the Best

The 08MM-ST05 is a stripping tool for RG59, 6, 11 and CAT series data and telephone cables. The ST05 is suited for use with many brands of cables and can be used for preparing cables for connectors including 'F' type, SDI, BNC, IEC, RCA, RJ45 and RJ12. The ST05 is a two-blade cable stripper with preset blade depths for coaxial cables, allowing you to use it without any adjustment. The CAT cable jacket stripper features an adjustable blade depth, allowing you to set it to the required cable type. The tool also features cutting and pinch blades for stripping jackets off flat cables.

Features and Benefits

» Suitable for RG59, RG6, RG11 coaxial cable and CAT series data/telephone cable

» Ideal for stripping outer jackets of UTP, STP and CAT series round cable

» The stripping tool also incorporates an in-built, adjustable cable cutter

» Provides a click-in, rotating cartridge to swap between RG59, RG6 and RG11 stripping

» Compact, lightweight design

» Allowing you to strip cable with five easy rotations
