

Stripping Tool for RG59, RG6 and RG11 including Spanner for 'F' Connectors 08MM-ST10

For the Best

The 08MM-ST10 is a stripping tool for RG59, 6, 7 and 11 cables. The ST10 is suited for use with many brands of cables and can be used for preparing cables for connectors including 'F' type, SDI, BNC, IEC and RCA. The ST10 is a two-blade cable stripper with preset blade depths, allowing you to use it without any adjustment. The tool features a standard 'F' type spanner on one end, making it the perfect tool for terminating and fitting off connectors.

Features and Benefits

- » Suitable for RG59, 6, 7 and 11 coaxial cable
- » Easy spring trigger to lock coaxial cable into place for stripping
- » Spanner can be used for tightening and loosening 'F' type connections
- » Adjustable blade to switch from RG59 and 6 to RG7 and 11 coaxial cable stripping
- » Compact, lightweight design
- » Allowing you to strip cable with five easy rotations
