

VHF/UHF Satellite Diplexer 09MM-SD02

For the Best

The 09MM-SD02 is a satellite and terrestrial diplexer for use in SMATV systems. The diplexer can combine or separate satellite and CATV (FTA) RF signals into or from a single feeder cable. The SD02 can separate signals so a TV and STB can be independently connected without interference from unwanted bands. The SD02 is Foxtel approved and supports an input frequency range of 5-2400MHz with an isolated output frequency range of FTA 5-862MHz and SAT 950-2400MHz.

Features and Benefits

- » Foxtel (F30358) approved
- » Combines and filters satellite and terrestrial signals into one coaxial cable
- » Diplexer can also be used in reverse to split satellite and terrestrial signal
- » 'F' type female connections
- » Compact design to easily fit in wall cavities
