

TERRA HD Modulator Single HDMI® In to HD DVB-T With HDMI® Loop Out 10MM-MT68

For the Best

The MT68 is an H.264 high definition encoder modulator featuring an HDMI® loop through connection, enabling you to retain an HDMI® quality image at your main TV while modulating the signal at resolutions up to 1080p simultaneously to distribute to the rest of the TVs in your home.

Features and Benefits

- » The TERRA HD modulator follows a strong run of quality products manufactured in Europe. This unit comes complete with a pre-labelled database for ease of use when one or more modulators are required.
- » HDMI® loop out allows for source signal to be modulated and then looped to a local device, no need for an HDMI® splitter
- » TERRA quality with Matchmaster support
- » RF loop-through
- » A pre-programmed database means no conflict when using multiple digital modulators in the same coaxial system.
- » Compact design for an easy and flexible installation
