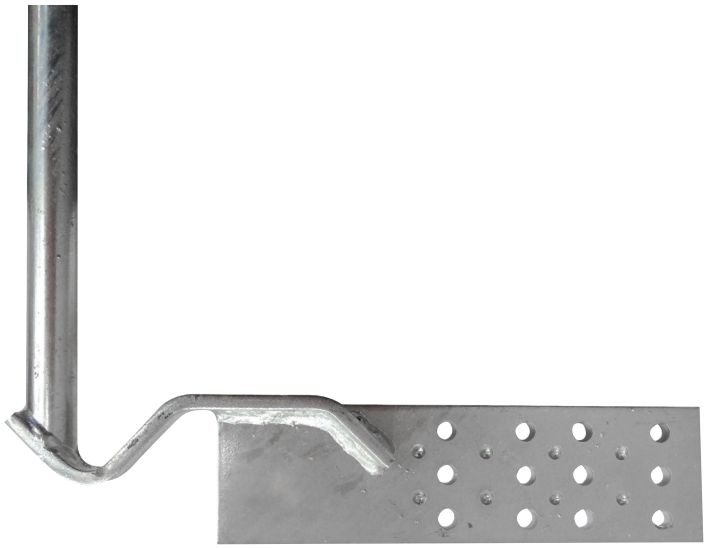
1.65m Gutter Kit
11MM-CM01

The CM01 is a 1.65m heavy-duty one-piece galvanised steel gutter mount. The 1.65m mast is welded directly to the base mount, allowing for a stronger, more durable mount. The CM01 is designed to be installed on the gutter line, so working from the roof surface is unnecessary, making for a safer installation. The CM01 does not penetrate the roof surface, minimising the risk of water penetration to the cavity.



Features and Benefits

- Suitable for attaching TV antennas and amplifiers
- Allows mounting around a roof gutter
- Galvanised finish
- Bolts to rafter under roof tiles and protrudes above guttering
- Heavy-duty construction
