

180m Catenary Wire Roll

11MM-CW180

The CW180 is a 180m roll of galvanised multistrand catenary wire made in Australia. It can be used in mast installations as guy wires or as an aerial cable support wire when running cables above ground. Made from stranded galvanised wire, the CW180 is designed to last in harsh Australian coastal and salt air environments.

Features and Benefits

- » 180m guy wire
- » Used to stabilise antenna masts over 12"
- » Galvanised steel
- » Heavy-duty construction
- » Foxtel approved (F10208)
