

90cm KU Band Satellite Dish 13MM-R90P

For the Best

The R90P is a single-pack 90cm dish for KU band satellite reception. The R90P is an offset satellite dish made from heavy-duty galvanised steel with a durable polyester powder coat finish. The dishes are suitable for the reception of VAST, Pay TV, and other available KU band satellite services between 10.7 GHz and 12.75 GHz.

Features and Benefits

- » Single pack 90cm offset KU band satellite reception dish
- » Rolled edges for added strength
- » Gain of 40.05dB at KU band 12.75GHz
- » Compatible with satellite mount diameters 38 to 50mm
- » Made from galvanised steel with a polyester powder coat finish for high durability
- » Azimuth adjustment 0-360° and elevation adjustment 15-75°

Specifications

Type	Offset
Offset Angle	28.81°
Reception Frequency	10.70 - 12.75 GHz
Ku-Band @ 12.75 GHz	40.05dB
Focus Length	450 mm
Efficiency	70% min
Size - Effective Surface (Major Axis x Minor Axis)	90cm x 102.7cm
Azimuth (Ground/Wall)	0° ~ 360°
Elevation (Ground/Wall)	15° ~ 75°
F/D Ratio	0.5
Material	Galvanized Steel
Finish	Polyester Powder Coating
Available Color	Dark Gray / Gray
Suitable Pole Diameter	38-50mm
Relative Humidity	0% ~ 100%
Operating Temperature	-40°C ~ 60°C
