

65cm Satellite Dish

13MM-SD65

The SD65 is a 65cm Foxtel approved offset steel satellite dish. The dish features a rolled steel edge for greater rigidity and strength and is made from powder-coated galvabond steel for corrosion resistance in the harsh Australian environment. This satellite dish is best suited to domestic residential and small commercial building applications and can be used with our SM04 tin roof and SM17 gutter mounts.

Features and Benefits
