

VHF Headend Kit with 6 Channels

14MM-KIT-420-VHF6

The 14MM-KIT-VHF6 is a VHF single channel filter headend from Terra Electronics suitable for use in both metro and regional zones where VHF transmission is used. The headend package caters for up to 6 VHF channels and provides independent SAW filtering and AGC control for each channel. The AT422 filter cards are easily programmed via the touch button control keys and can be electronically locked once configured to prevent unwanted tampering by others. The headend package can be easily installed into communications racks or fastened directly to a wall.

Parts included:

3x 14MM-AT422
1x 14MM-MA400
1x 14MM-UP410S
2x 14MM-CB420
1x 14MM-MR19-420
