

Terra Fibre Transmitter 1555nm +6dBm 20MM-MO418-1555

The Terra MO418-1555 is a wideband fibre transmitter with +6dBm output. The wavelength is set to 1555nm to be compatible with GPON and XG-PON networks. The MO418-1555 is part of the Terra 400 series headend and fibre equipment range.

Features and Benefits

- » 1555nm +6dBm fibre transmitter to work with GPON and XG-PON networks
- » Can be powered by either 14MM-UP410S standalone power supply or 14MM-UP413 for redundancy
- » Can be paired with Terras 14MM-OAD514 or 14MM-OAD518 EDFA's to increase network size
- » Can be paired with Terras 20MM-SO414 or 20MM-SO418 optical splitters
- » Din rail or wall mounting option, rack mount option by 14MM-MR19-420
- » SC APC connectors
