

610mm Recess or Surface Mount Enclosure for Home Wiring Systems **30MM-DH600R**

The DH600R DigiHUB® is a newly designed enclosure that suits surface and recessed installations. The DH600R features a 25mm adjustable edge frame, allowing for a neat finish to the wall surface. The hub provides a simple and tidy way to manage all your home networking, AV and communication solutions. Designed for use with DigiHUB® accessories, DHPO8 CAT6 data patch, TM48S phone patch module, DS04 and DS08 TV distribution modules. An MP01 mounting plate can be added to allow for the simple addition of equipment such as network switches, routers, modems, multiswitches and IR control systems.

Features & benefits

- » Designed for recessed or surface mount installations with the ability to adjust to suit any wall depth using the sliding frame edge.
- » Suits data, TV, pay TV, IR control, phone network and security system distribution with a lockable door to protect equipment
- » Compact and discreet for use in the modern smart home. Size: 372x610x111mm (WxHxD)
- » Suitable for homes, apartments, townhouses and offices
- » Handy cutouts in the rear for cable access, power points with punch-out points at the top and bottom for additional cable management
- » Made from high-grade powder-coated steel for durability, it features a removable door and depth adjustable frame edge cover for a tidy finish.
