

HDMI® 18Gbps Extender Splitter with 1x HDMI® Loop Out and 4 x Cat6 Out 35m with IR and PoC 34MM-4K50-4

34MM-4K50-4 is a 4K HDR HDMI® extender splitter over Cat6 with a maximum distance of up to 35m, supporting 18Gbps, HDCP 2.2 and 3D signal. 4K50-4 extends your 4K signal to four TVs with remote IR control and without video or audio quality loss. In addition, 4K50-4 features an HDMI® loop out for local TV connection and PoC (Power over Cable) needing only one power supply at the source end. Pay TV compliant IR receiver, and transmitter included.

Features and Benefits

- » HDMI® loop out port allows for cascading additional extenders, splitters or connecting a local TV.
- » Supports 'power over cable' function POC. RX units powered by the splitter thru the CAT6 connection
- » 1 x IR Transmitter and 4 x IR receiver included (one for each RX unit)
- » Capacity for 4K/60Hz High Speed HDMI® (18Gbps) to 35m with CAT6.
- » Digital audio extraction via S/PDIF RCA and analogue audio extraction via 3.5mm socket
- » 4K High Speed HDMI®, HDCP 2.2/HDCP 1.4 and DVI 1.0 compliant
