

# Wireless IR Remote Control Extender Kit 34MM-IRKIT-W

*For the Best*

The IRKIT-W is a wireless IR control kit that allows you to remotely control your sources throughout the home. The IRKIT-W easily allows for expansion to control from multiple locations with the addition of a 34MM-IRTX-W transmitter (sold separately). The wireless IRKIT-W is perfect to use where it is either difficult or impossible to run cables.

## Features and Benefits

- » Wireless IR Remote control Extender via RF
- » Allows control of audio/video equipment wireless through walls
- » RF Carrier Frequency 433.92MHz
- » Maximum range of 50m - line of sight
- » Compact design for discrete installation
- » Control up to 3 separate sources using supplied IR Emitter

## 34MM-IRKIT-W Specifications

Transmitter	
Infrared Frequency Input	35~41KHz
IR Receiving Range	≥8m
Carrier Frequency	433.92MHz
Power Supply	9VDC 600mA
Receiver	
Carrier Frequency	433.92MHz
Infrared Output	3731KHz
IR Receiving Range	≥3m
Power Supply	9VDC 600mA
