

# 4TB Surveillance Internal Hard Drive - 64MB Cache SATA 6Gb/s 3.5" 50MM-A004

*For the Best*

The A004 is a 4TB surveillance HDD designed for 24/7 high definition surveillance recording systems. This surveillance grade HDD minimises any video interruptions, pixilation and errors in video recording solutions. HDD designed for 24/7 recording with up to 64 cameras.

## Features and Benefits

- » The industry's first surveillance-optimised hard drive precision-tuned for high write surveillance workloads operating 24x7
- » 4TB video storage solution. Up to 34 days of 24hr recording for 4x 5MP cameras at 20 frames per second using H.265 compression.
- » Engineered for workloads of 180TB/year, three times that of desktop drives
- » Low power consumption and start-up current to minimise heat and vibration emission, improving long-term drive reliability
- » Tarnish-resistant components to help protect the drive from environmental elements, increasing field reliability
- » Best-in-class acoustic performance means virtually silent operation.

## 50MM-A004 Specifications

|                     |            |
|---------------------|------------|
| Capacity            | 4TB        |
| Interface           | SATA 6GB/s |
| Cache               | 64mb       |
| Drive Bay Supported | 8+         |
| Cameras Supported   | Up to 64   |
| MTBF (Hours)        | >1,000,000 |
