

30mm Conduit Box Height Extender for 58MM-CB01

58MM-CE01

The CE01 is a height extender accessory for the CB01 conduit box, allowing you to expand the capacity of the CB01 or recess the CB01 into concrete walls, slabs, or other cavities to conceal conduits for a cleaner wall finish. The CE01 is supplied with four 4x45mm nickel-plated brass screws to securely fasten together while providing optimal corrosion resistance.

Features and Benefits

- » Expands the capacity of CB01 by an additional 30mm for a total height of >65mm
- » Allows the CB01 junction box to be recessed into the wall and slab surfaces to conceal conduits
- » Provides simple and secure cable management and protection for both electrical and communications installations
- » Designed for both residential and commercial applications
- » Made from durable PVC plastics for long life and cable protection
- » Perfect one-stop product to keep in your work vehicle
