

# 30mm Conduit Box Height Extender for 58MM-CB02

## 58MM-CE02

The CE02 is a height extender accessory for the CB02 conduit box, allowing you to expand the capacity of the CB02 or recess it into concrete walls, slabs, or other cavities to conceal conduits for a cleaner wall finish. The CE02 is supplied with six 4x45mm nickel-plated brass screws to securely fasten together while providing optimal corrosion resistance.

### Features and Benefits

- » Expands the capacity of CB02 by an additional 30mm for a total height of >65mm
- » Allows the CB02 junction box to be recessed into the wall and slab surfaces to conceal conduits
- » Provides simple and secure cable management and protection for both electrical and communications installations
- » Designed for both residential and commercial applications
- » Made from durable PVC plastics for long life and cable protection
- » Perfect one-stop product to keep in your work vehicle
