

TERRA's series of optical splitters are part of the TERRA 400 series headend and fibre equipment range. They are available in four-way and eight-way balanced splits. They are perfectly matched to TERRA's MO418 and MO428 +6dBm transmitters to deliver your MATV/SMATV signal within your receiver optical level range.

### Features and Benefits

- » AT series optical splitters offer a range of configurations with single and twin inputs and outputs
- » Uses the industry standard connector SC/APC for optical connection
- » Mounts on the AT series 1RU frame
- » Compact design for low density use of rack space

Product Code	In	Out	Insertion Loss
20MM-SO414	1	4	7dB
20MM-SO418	1	8	10dB
